These recommendations are divided into three sections.. Employee Communications Â· Security Â· Other Skills.Q: How to scrape list from the table? I have a problem in scraping list from the website using BeautifulSoup4 So i have a problem with parsing that 'list of lists' I want to get that thing from index.html and put in a list the structure of this 'list of list' is like below: [['a','b','c'],['d','e','f'],['g','h','i'],...] So, the problem is i don't know what to do with variable 'Board' it looks like, we have a list inside the list but i am not sure if there any other way! Please help me, thank you! A: You can also use CSS selector by adding [class^=Board] class to retrieve the desired output. Option 1: Using CSS selector : >>> from bs4 import BeautifulSoup >>> a = " >>> soup = BeautifulSoup(a) >>> elems = soup.select('[class^=Board]') >>> for elem in elems: print(elem.text) a b c d e f g h i Option 2: Using XPath >>> from bs4 import BeautifulSoup >>> a = " >>> soup = BeautifulSoup(a) >>> elems = soup.select('//*[@id="gameBoard"]')/tbody/tr/td[2]/span/table[2]/tr/td') >>> for elem in elems: print(elem.text) 5k 5kg
